CARE FOR YOUR SMILE!

Taking care of your teeth, gums and tongue has many benefits. Aside from giving you a brighter smile, oral health care routines like brushing and flossing help to prevent a build up of plaque and tartar.

Setting up a good oral healthcare routine is an important part of keeping your mouth healthy. This includes having set times of the day when you brush your teeth, as well as how long you brush for.

We recommend brushing your teeth twice a day (morning and night) and brushing carefully for a full two minutes. This is a great way to maximise the benefits of brushing.

Choosing the right toothpaste, floss and mouthwash is also helpful in maintaining your oral health routine. Taking floss or dental picks with you throughout the day can help you remove food that gets caught between your teeth.

If you want to improve your oral health, but you're not sure where to start, talk to the team at healthSAVE Pharmacy.
